

Flexible and proactive monitoring of your KODAK CTP Devices for more control and maximum uptime.

Now you can know immediately when your CTP devices need attention, no matter where you are, and check status with a quick glance at your mobile phone. No more waiting around to load more plates, and no wasted time while the machine sits idle, waiting for you.

Eliminate waiting, and rise to a new level of productivity.

- Monitor up to 10 CTP devices.
- App shows whether CTP device is running or stopped for any reason, plus detailed information such as current job, jobs in the queue, active plate cassette count, environmental conditions, event history, and more.
- Push notifications alert you when a device needs attention.
- View details of jobs in the queue, resubmit jobs directly from the app, and lock or unlock the queue.
- Available for Android and iOS mobile operating systems.*
- Safe and secure cloud system utilizing Amazon Web Services (AWS).
- Supports 10 languages: English, Chinese, Dutch, French, German, Italian, Japanese, Portuguese, Russian, and Spanish.
- For KODAK MAGNUS, ACHIEVE, and TRENDSETTER Platesetters.

* Check list of supported phone models and recommended screen sizes. Requires high-speed Internet connection.
