

# Build Loyalty and Control Costs

Give your customers a direct connection that secures and streamlines the job submission, communication and tracking process.

Keeping your customers satisfied means producing accurate, high-quality work in an error-free, timely process. KODAK INSITE Prepress Portal streamlines job submission, collaboration and management for both you and your customers, enabling a highly efficient prepress process. With round-the-clock access and full integration with KODAK PRINERGY Workflow, INSITE Prepress Portal provides powerful tools for minimizing errors, unexpected costs and delays, while strengthening customer relationships.

## Deliver a best-in-class customer experience

With branded sites and individual user functionality, productivity and collaboration have never been easier.

## Improve efficiency by streamlining file submissions and approvals

Reduce cycle time with remote job submission, real-time collaboration and online approval. Give prepress operators, customer service representatives and your customers full job visibility 24x7x365, helping boost overall productivity.

## Catch problems early

Automatically identify errors at job submission with integrated PRINERGY Preflight+, so problems can be corrected before they become a costly rework.

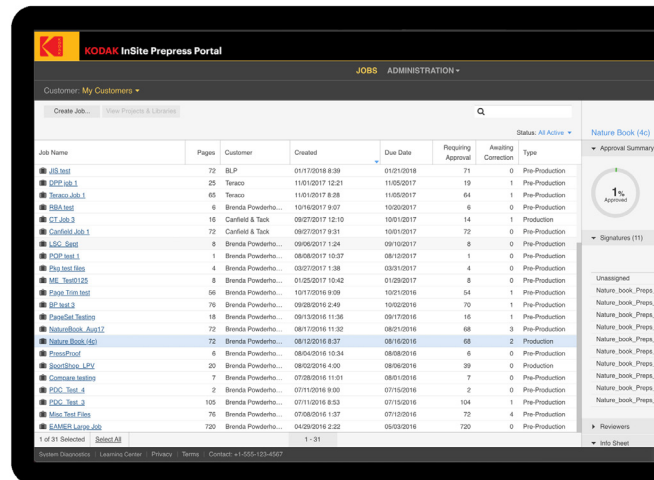

## Speed turnaround times and reduce hard copy costs

Eliminate hard copy proofs with our MATCHPRINT Virtual calibration solution, saving time and money.

## Connect multiple locations with a secure solution

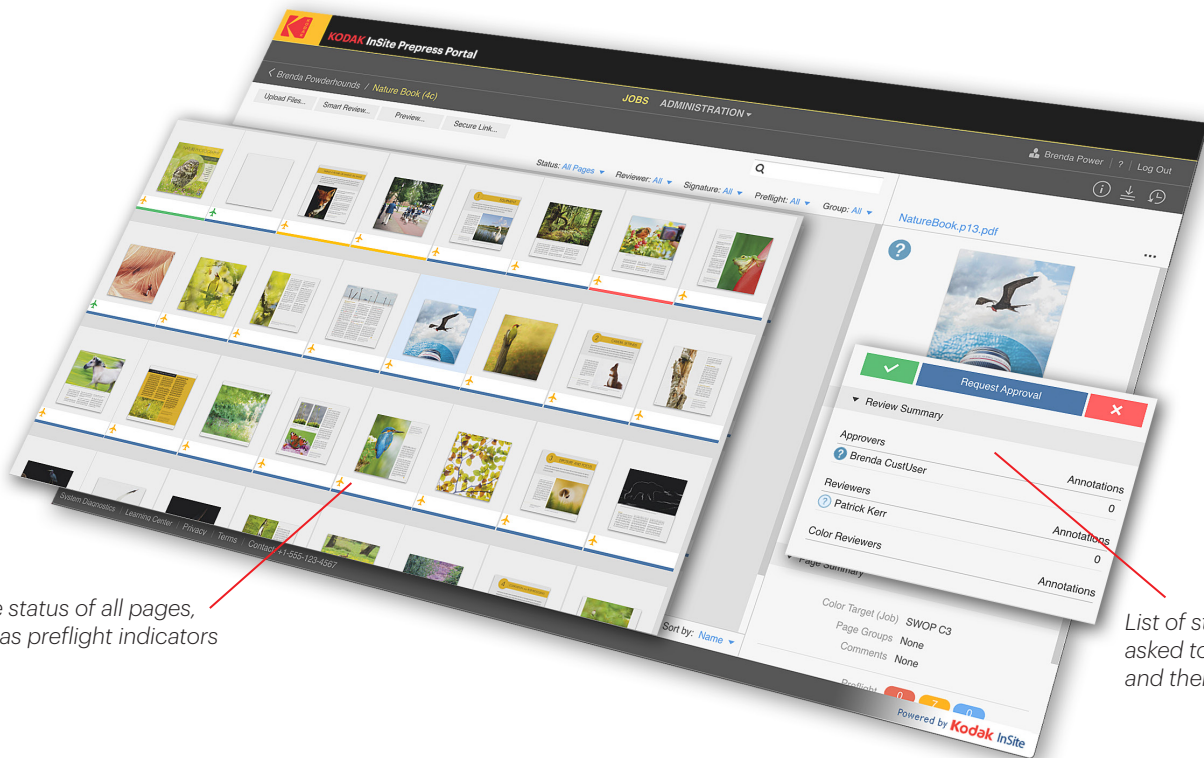

Build a single login for large, multi-site companies with INSITE Enterprise. When paired with PRINERGY Workflow and INSITE Prepress Portal, this option allows your customers to view their jobs across multiple locations in a secure environment.

INSITE Prepress Portal provides a comprehensive view of all jobs.

**INSITE Prepress Portal provides a comprehensive overview of all pages and their status.**
