Improve Color Quality and Consistency

Save time and money by managing color relationships among all the devices in your print production workflow.

Accurate, consistent color is the core of your business. KODAK COLORFLOW Pro Software integrates the many elements and devices in a typical print production environment, ensuring that all color control elements, curves, ICC profiles and spot color recipes are used correctly together. The end result? Stable, top-quality color on virtually every job, delivered predictably and efficiently across devices and print processes.

Produce accurate, high-quality color faster

Spend less time fixing problems and more time printing, with a single platform that stores and automates precision color adjustments, aligns and controls color across devices and print environments, and boosts overall production efficiency.

Dial in color output to your own production environment

Control your gray balance using color output with ICC profiles, DeviceLinks, and tonal curves that employ Kodak's patented color algorithms for smoother, more accurate results.

Control costs with comprehensive reporting tools

Catch problems early with the ability to check solid ink density and tonal response, analyze gray balance and neutral print density, and compare device gamuts or response to a target or standard.
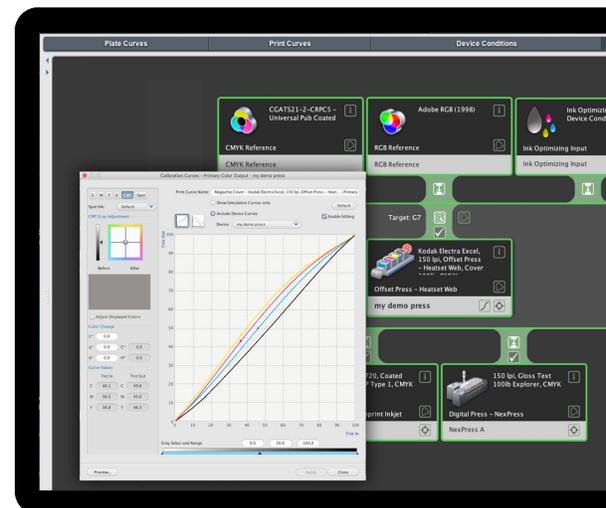

Reduce ink consumption by up to 30%

With the KODAK Ink Optimizing Solution option, leverage sophisticated color conversion intelligence to reduce CMY ink usage without sacrificing color quality or the sharpness of text and line art.

Expand your business

Win jobs with multi-national clients with the ability to standardize and optimize color across virtually all print processes, and to comply with a broad range of international standards including ISO, GRACoL, SWOP, G7, Fogra and others.

COLORFLOW Pro Software automatically generates G7 curves.

Powerful tools allow you to edit and align your grays with ease.

Common tools for curve and ICC profile editing.

Predict color on-screen.

KODAK **COLORFLOW PRO** SOFTWARE

Operating system	MICROSOFT WINDOWS OS, MAC OSX 10.12+
System recommendations	INTEL PENTIUM 4 CPU; minimum 2.8 GHz; minimum 2 GB RAM; minimum 300 MB available hard disk space; 1280 x 960 screen resolution
Compatibility	KODAK PRINERGY Workflow
Supported measuring instruments	X-RITE i1 and i1iO, X-RITE iSiS & XL, iSiS 2 & XL spectrophotometer
Optional add-ons	Ink Optimizing Solution
