

Ironclad & Always On

KODAK PRINERGY VME with Managed Services shifts your on-premise workflow IT infrastructure to a virtual environment, then monitors and manages it 24/7, freeing you from the costs and constraints of system administration. Our proactive and highly secure management system is **always on**, so sit back and enjoy the constant stream of upgrades and real-time analytics. We will do the rest.

Revolutionary

Ground-breaking, industry first innovation, marrying cloud technology to managed services.

Proactive Security

Backed by Microsoft Azure, with a \$1B+ investment in security and R&D, ironclad multi-layered security to protect your data 24/7.

Reduce On-Staff IT Costs

Allow your on-staff IT professionals to focus on other important projects, saving time and network maintenance costs.

Data Assurance

Your data is backed up in real-time. In the event of a catastrophic fail, data is safe and can be recovered ensuring business continuity.

Productivity

The PRINERGY Extension License allows your workflow to expand as needed based on the requirements of your business, saving up to \$100,000.

Reliability

Your system is always on. PRINERGY VME provides steadfast and proven reliability in performance.

Privacy by Design

Customer data is completely separate which eliminates accidental accessibility between customers.

Reduces Cost of Ownership

Remotely managed upgrades and updates eliminates the need for expensive hardware, optimizes time-to-value ratios and lowers the total cost of ownership.

Ready to see what PRINERGY VME with Managed Services can do for your business?

We will set-up a **30-day risk free test** environment to run in parallel with your current workflow environment. Ask your Kodak Sales Representative for details.
